

## **04-07 CTS-V Transmission Mount Install Instructions**

1. Raise vehicle using lift or jack and jack stands.
2. Place jack just forward of transmission mount under transmission, raise jack until it comes in contact with transmission.
3. Using a 15mm socket or wrench, remove the two lower transmission mount nuts.
4. Now remove the transmission cross member. There are four bolts that require a 15mm socket or wrench and two bolts that require a T-50 torx bit.
5. Using a 15mm wrench, remove the two upper transmission mount bolts.
6. Now jack up the transmission as high as it will go without damaging the shifter linkage.
7. Remove transmission mount (this may require lowering the exhaust depending on your exhaust set-up)
8. Reverse order to install your new Creative Steel transmission mount.
